Algebra 1 Quick Quiz 11152022

Question 1.

Which of the following tables does **not** represent a function?

	x	f(x)
F>	2	7
	3	10
	5	16
	8	25
F>	3 5	10 16

	x	f(x)
	1	2
G	7	2
	-4	2
	-5	2

	x	f(x)
Ð	36	6
	36	-6
	25	5
	25	-5

	x	f(x)
	0	36
J	2	38
	9	45
	20	56

Question 2

x	у
0	4
3	1
6	-2

Which equation **most** likely describes the relation indicated by the table?

F
$$y = x + 4$$

G $y = x - 2$
H $y = -x + 4$
J $y = -x - 8$

Question 3.

The table shows the relationship between the cost, \mathbf{c} , in dollars of a taxi ride and the number, \mathbf{t} , of minutes the ride lasts.

Which equation algebraically represents this data?

F
$$c = 3 + 0.35t$$

 $c = 2.75 + 0.5t$
 $c = t - 0.25$
 $c = 4 + 0.15t$

Question 4.

The graph shows part of a function f.

What is the range of the function?

- F All real numbers
- All real numbers less than or equal to five
- H All real numbers greater than zero
- All real numbers between 2 and 6

Question 5.

In which table are all the points represented by the equation y = (-x/4) + 2?

Question 6.

Which of the following represents the graph of a function?

Question 7.

Which of the following sets of ordered pairs is a function?

$$\begin{array}{c|c} \hline F & \{(2, 1), (2, 2), (3, 4), (5, 6)\} \\ \hline G & \{(-2, -1), (1, 2), (3, 4), (1, 5)\} \\ \hline H & \{(1, 2), (2, 2), (3, 3), (2, 4)\} \\ \hline I & \{(1, 1), (2, 1), (3, 2), (4, 4)\} \end{array}$$

Using the function machine from the diagram, what is f(10)?

F	5
<mark>G</mark> >	7.5
H	15
[]>	25

Question 9.

Which is a zero of the function $f(x) = x^2 + 3x - 4$?

Question 10.

What is the range of the function f(x) = (1/2)x + 5 when the domain is $\{2, 4, 6\}$?
