

Algebra Quick Quiz 0214024

Question 1.

One way to represent a function $f(x)$ is to use a mapping diagram like the one below.

Which of the following is NOT another correct way to represent $f(x)$?

- A** x is every integer between -1 and 3 and $f(x) = 3x - 2$.
- B** $f(x) = \{(-1, -5), (0, -2), (1, 1), (2, 4), (3, 7)\}$
- C** $f(x) = 3x + 2$ and the domain is $\{-1, 0, 1, 2, 3\}$.
- D** The range is $\{-5, -2, 1, 4, 7\}$ and $f(x) = 3x - 2$.

Question 2

Find the range for the function rule $y = 3x + 4$ for the domain $\{-3, -2, -1, 2\}$.

- A** $\{-3, -2, 4, 6\}$
- B** $\{5, 10, 12, 16\}$
- C** $\{-5, 10, 2, 1\}$
- D** $\{-5, -2, 1, 10\}$

Question 3.

Find $f(-2)$ given $f(x) = x^2 - 3x + 4$.

- A** 4
- B** 6
- C** 14
- D** 16

Question 4.

Which of the following is most likely represented by this graph?

- A** a lawn mower that runs out of gas
- B** the outdoor temperature on a hot day as it approaches noon
- C** your speed as you jog and then go up a steep hill
- D** the weight of a turtle

Question 5.

Which table of values was used to make the following graph?

- A**

x	-3	-1	0	1
y	-2	-1	2	4
- B**

x	-3	-2	0	1
y	4	2	2	4
- C**

x	-3	-1	0	1
y	-4	0	2	4
- D**

x	-3	-2	0	1
y	-3	-2	2	4

Question 6.

Which situation could the equation $y = 20x + 80$ represent?

- A You bought a CD player for \$80 and then bought \$20 worth of CDs.
- B You have paid \$20 toward a new television and plan to pay \$80 more each month.
- C You received 2 gift certificates for \$20 for your birthday and already had saved \$80 worth of gift certificates.
- D You have saved \$80 and add \$20 to your savings each month.

Question 7.

Which of the following tables can be generated by $y = x^2 + 2$?

A

x	y
-1	1
0	2
1	3
2	4

C

x	y
2	4
0	2
-1	2
-2	8

B

x	y
-2	0
-1	1
0	2
1	3

D

x	y
-1	3
0	2
1	3
2	6

Question 8.

Try to reason this out without the use of graphing software. I trust you to be honest.

Which of the following is the graph of $y = x^2 - 1$?

Question 9.

Which of the following is the function rule for the table shown below?

c	$G(c)$
-2	17
-1	5
0	1
1	5
2	17

- A $G(c) = c + 19$
- B $G(c) = c^2 + 13$
- C $G(c) = c^4 + 1$
- D $G(c) = 4c^2 + 1$

Question 10.

The graph shows the cumulative distance Yolanda traveled on her week-long bicycle trip.

Which best describes what happened during Days 2-4?

- A Yolanda rode downhill.
- B Yolanda rode on a flat place.
- C Yolanda took a break from riding.
- D Yolanda rode 150 miles each of those days.

Bonus Question

Question 11

Part A

At a clothing store, Ted bought 4 shirts and 2 ties for a total price of \$95. At the same store, Stephen bought 3 shirts and 3 ties for a total price of \$84. Each shirt was the same price, and each tie was the same price. Which system of equations can be used to find s , the cost of each shirt in dollars, and t , the cost of each tie in dollars?

- A.
$$\begin{cases} 6(s + t) = 95 \\ 3(s + t) = 84 \end{cases}$$
- B.
$$\begin{cases} 4s + 2t = 95 \\ 3s + 3t = 84 \end{cases}$$
- C.
$$\begin{cases} 7s + 5t = 179 \\ s + t = 12 \end{cases}$$
- D.
$$\begin{cases} 7s + 5t = 179 \\ 7s + 5t = 12(s + t) \end{cases}$$

Part B

Linda bought 1 shirt and 2 ties at the same store. What is the total price, in dollars and cents, of Linda's purchase?

Enter your answer in the box.
